FIRST PAGE LEFT LEFT BLANK

Literate Data Model

Preliminaries
the basic structure of the model

In Literate Data Modeling, the main components of interest are typically Classes, Attributes, Models, and Subjects. However, to streamline the model and promote reusability, we introduce a supertype called Component. By defining common attributes and behaviors in the Component class, we can inherit them in the subclasses, ensuring consistency and reducing duplication throughout the model.

We present the Component class first because it is a best practice in modeling to introduce supertypes before their subtypes. This approach allows readers to understand the general concepts and shared properties before delving into the specifics of each specialized component.

Component
An element or building block of the literate data model

Components
Components
Annotation
LiterateDataModel , Subject , Class , Key , AttributeSection , Attribute , Constraint , Method , ParameterAnInputToAMethod

the name of the component, not in camel case
(String value O_O)

This is a warning with emoji

The name of the component
(CamelName value O_O)

(QualifiedCamel value O_O)

a short form of the component's name, used for cross references and improved readability.
(CamelName value O_O)

"LDM" is the short form of "Literate Data Model".
name - how do you say name in english?
x.name == y
the abbreviated name should be shorter than the actual name
len(abbreviatedName) < len(name)
Why have an abbreviation longer than the name?
Warning
Does this annotation find it's way to the Constraint? YES! It's fixed!

A brief, one-line definition or description of the component, suitable for use in a descriptive table of contents. _
(OneLiner value O_O)

A more detailed explanation or discussion of the component _
(RichText value O_O)

Indicates whether this component is an embellishment added during post-parsing processing _
(Boolean value O_O)

false
This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

(Boolean value O_O)

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

(Boolean value O_O)

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

(Boolean value O_O)

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

(Boolean value O_O)

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

(Boolean value O_O)

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

*(**Boolean** value O_O)*

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Indicates whether this component is an embellishment added during post-parsing processing _

*(**Boolean** value O_O)*

false

This attribute is set to true for components that are automatically generated or added during the fleshing out, review, or rendering processes, such as implied attributes or suggested model elements. It helps distinguish embellishments from the core model elements defined in the original LDM source.

Classes

Class
A key entity or object type in the model, often corresponding to a real-world concept

Classes
Subtyping , Key , AttributeSection , ClassConstraint
Component
ReferenceType
Within each Class, attribute names must be unique.

the normal English plural form of the name of the Class
(UpperCamel value O_O)

Might be Books for the Book class or other regular plurals.

- But also might be People for Person.

When inputting a model, you will rarely need to specify the plural form. The input program will just look it up.
the regular plural, formed by adding "s" or "es".

the Class or Classes on which this class is dependent
(Set of Class value O_O)

This is solely based on **Existence Dependency** . A true dependent entity cannot logically exist without the related parent entity. For instance, an Order Item cannot exist without an Order. If removing the parent entity logically implies removing the dependent entity, then it is a dependent entity.

that basedOn and dependentOf are being used synonymousle in this metamodel.
Class.inverseOfBasedOn

The parent class
(Es value O_O)

the criteria, or dimensions, by which the class can be divided into subtypes
(List of Subtypings value O_O)

in a library model, the `Book` class could have subtypings based on genre (e.g., Fiction, Non-fiction), format (e.g., Hardcover, Paperback), or subject (e.g., Science, History).
Subtyping.inverseOfSubtypings

Any subtypes or specializations of this class based on it's subtypings.
(List of Classes value O_O)

For instance, using the `Book` example, the subtypes could include `FictionBook` , `Non-fictionBook` , `HardcoverBook` , `PaperbackBook` , `ScienceBook` , and `HistoryBook` .

Class.inverseOfSubtypes

The attributes or properties of the class, in the order in which they should be presented _

(List of Attributes value O_O)

Attribute.inverseOfAttributes

additional attributes or properties of the class, grouped for clarity and elaboration. _

(List of AttributeSections value O_O)

AttributeSection.inverseOfAttributeSections

Any constraints, rules, or validations specific to this class _

(List of Constraints value O_O)

Constraints may be expressed on either the Class or the Attribute. Always?

Any behaviors or operations associated with this class _

(List of Methods value O_O)

Method.inverseOfMethods

the Classes which are basedOn this Class

Component

Derivation
A rule or formula for deriving the value of an attribute

Derivations

An English language statement of the derivation rule _
(RichText value O_O)

The formal expression of the derivation in a programming language _
(CodeExpression value O_O)

Constraint
A rule, condition, or validation that must be satisfied by the model

Constraints
Component
ClassConstraint , AttributeConstraint

An English language statement of the constraint _
(RichText value O_O)

The formal expression of the constraint in a programming language
(InventedName value O_O)

(Code value O_O)

```
Warning, nothing fatal; just a caution
Error, serious. Fix now
```

Methods

Method
A behavior or operation associated with a class

Methods
Component

The input parameters of the method _
(List of Parameters value O_O)

ParameterAnInputToAMethod.inverseOfParameters

The data type of the value returned by the method _
(DataType value O_O)

Inverse attribute for Class.methods from which this was implied.
(Class value M_1)

Class.methods

String

Strings
RALStrings

String is trivial; no diagram

CamelName

A short string without punctuation or spaces, suitable for names, labels, or identifiers and presented in camel case.

CamelNames
RALCamelNames
String
UpperCamel , LowerCamel

(String value O_O)

Must follow the camel case naming convention and not be empty.
"firstName", "orderDate", "customerID"

- *CamelName* is presented here, just after its first usage by another class (Component), to provide context and understanding before it is used further in the model.

CamelName is trivial; no diagram

UpperCamel a CamelName that begins with a capital letter

_ "Customer", "ProductCategory", "PaymentMethod"
content begins with an upper case letter.
UpperCamels
RALUpperCamels
CamelName

UpperCamel is trivial; no diagram

LowerCamel
a CamelName that begins with a lower case letter

"firstName", "orderTotal", "shippingAddress"
content begins with a lower case letter.
LowerCamels
LowerCamels
CamelName

LowerCamel is trivial; no diagram

QualifiedCamel
an expression consisting of Camel Names separated by periods

QualifiedCamels
QualifiedCamels
String

content consists of CamelNames, separated by periods. Each of the camel names must be Upper Camel except, possibly, the first.

QualifiedCamel is trivial; no diagram

ValueTypeRichText
A string with markup for block level formatting.

ValueTypeRichTexts
ValueTypeRichTexts

Annotation Types Used

These are the recognized Annotation Types for the LDM model.

And this is how you register the AnnotationTyped for a model. By including this sort of array in the DSL document for the model.

label Error
emoji
emojiName cross_mark
emojiUnicode U+274C
purpose Indicates a critical error or failure in the model.
label Warning
emoji ⚠
emojiName warning
emojiUnicode U+26A0
purpose Indicates a potential issue or warning in the model.
label Note
emoji
emojiName blue_book
emojiUnicode U+1F4D8
purpose Provides additional context, explanations, or clarifications for the annotated element.
label Issue
emoji ⚠
emojiName warning
emojiUnicode U+26A0
purpose Highlights a potential issue or error that needs to be addressed or resolved.
label Question
emoji
emojiName question
emojiUnicode U+2753
purpose Raises a question or seeks further clarification about the annotated element.
label Suggestion
emoji
emojiName bulb
emojiUnicode U+1F4A1
purpose Provides a suggestion or recommendation for improving the model or the annotated element.
label Info
emoji ℹ
emojiName information_source
emojiUnicode U+2139
purpose Offers relevant information, facts, or details about the annotated element.
label Todo
emoji
emojiName pushpin
emojiUnicode U+1F4CC
purpose Indicates a pending task, action item, or future work related to the annotated element.
label Reference
emoji
emojiName globe_with_meridians
emojiUnicode U+1F310
purpose Provides a reference or link to an external resource or documentation.
label See
emoji
emojiName mag
emojiUnicode U+1F50D
purpose Indicates a cross-reference to another relevant element within the model.

Annotation types as CSV

```
label,emoji,emojiName,emojiUnicode,purpose
Error,❌,cross mark,U+274C,Indicates a critical error or failure in the model.
Warning,⚠️,warning,U+26A0,Indicates a potential issue or warning in the model.
Note,📘,blue book,U+1F4D8,"Provides additional context, explanations, or clarifications for the annotated element."
Issue,⚠️,warning,U+26A0,Highlights a potential issue or error that needs to be addressed or resolved.
Question,❓,question,U+2753,Raises a question or seeks further clarification about the annotated element.
Suggestion,💡,bulb,U+1F4A1,Provides a suggestion or recommendation for improving the model or the annotated element.
Info,ℹ️,information_source,U+2139,"Offers relevant information, facts, or details about the annotated element."
Todo,📌,pushpin,U+1F4CC,"Indicates a pending task, action item, or future work related to the annotated element."
Reference,🌐,globe with meridians,U+1F310,Provides a reference or link to an external resource or documentation.
See,🔍,mag,U+1F50D,Indicates a cross-reference to another relevant element within the model.
```

	label	emoji	emojiName	emojiUnicode	purpose
0	Error	❌	cross_mark	U+274C	Indicates a critical error or failure in the model.
1	Warning	⚠️	warning	U+26A0	Indicates a potential issue or warning in the model.
2	Note	📘	blue_book	U+1F4D8	Provides additional context, explanations, or clarifications for the annotated element.
3	Issue	⚠️	warning	U+26A0	Highlights a potential issue or error that needs to be addressed or resolved.
4	Question	❓	question	U+2753	Raises a question or seeks further clarification about the annotated element.
5	Suggestion	💡	bulb	U+1F4A1	Provides a suggestion or recommendation for improving the model or the annotated element.
6	Info	ℹ️	information_source	U+2139	Offers relevant information, facts, or details about the annotated element.
7	Todo	📌	pushpin	U+1F4CC	Indicates a pending task, action item, or future work related to the annotated element.
8	Reference	🌐	globe_with_meridians	U+1F310	Provides a reference or link to an external resource or documentation.
9	See	🔍	mag	U+1F50D	Indicates a cross-reference to another relevant element within the model.
